

# Introduction

- Users can login and start timer when they do any sort of work in which they can categories their work.
- At the end of the day they can see their graph report and analyse where they are spending the time most on and can avoid the unproductive hours
- Based on the hour you spent on the day you will be given a score which will be displayed in leader board
- Also you make make friend requests with your friends have a separate leader board.

## User Analysis

- There are similar applications like clockify, toggle etc.. which are neither beginner friendly nor easy to use
- These time trackers are meant for professionals
- The one we build can be even used by school children

## Simple Layout

### Login

# Time Analyser

## Login page

A hand-drawn sketch of a login page layout. The page is enclosed in a rectangular border. At the top, the text "Username" is followed by a horizontal line representing an input field. Below that, "Password" is followed by a horizontal line. In the center, there is a rectangular button labeled "Login". Below the button, the text "Forgotten your password?" is written, with "Forgotten", "your", and "password?" each underlined. Below this text, the word "OR" is centered. At the bottom of the page, the text "Don't have an account? Sign up." is written, with "Sign up." underlined. There are some faint, illegible scribbles and lines around the main content area.
