GROUP NO :25

USER ANALYSIS

TWO END USERS

ADMIN

- UPLOAD PARCEL DETAILS
- TRACKING THE PARCELS
- MONITORING THE PARCELS

STUDENT

- VIEW HIS/HER PARCELS
- TRACK HIS/HER PARCELS

WHY AMRITA PARCEL MANAGEMENT SYSTEM ??? (INSTITUTION PERSPECTIVE)

Tracking student's
orders

Theft free parcel
distribution

Monitoring of
banned
substances inside
college

WHY AMRITA PARCEL MANAGEMENT SYSTEM ??? (STUDENT'S PERSPECTIVE)

To stop theft of parcels

To stop miss placement of parcels

To solve the problem on delaying the pickup
time

HOW IT WORKS (ADMIN)

- The parcel details will be updated as soon as it enters the campus. From in time ,in date, name of the receiver, parcel id and mobile no.
- The status of the parcel will be updated by the user
- When the student comes to take his parcel, he enters the otp and verify the name of the receiver.
- Admin will have the statics of how many parcels were bought from a particular person and from which agency. Weekly , monthly and yearly statics is provided
- He will be able to know the total number of parcels in and out.

HOW IT WORKS (STUDENT)

- As soon as the parcel arrives the details of the parcel is uploaded in the PMS (AMRITA PARCEL MANAGEMENT SYSTEM) , a message is sent to the students stating that his/her parcel is arrived.
- The student can convey whether he/she can get it immediately or later through his/her PMS.
- After reaching the admin, the student will get an otp to confirm that he is the one who is taking the order and not others.

PAGES

- This website has 5 main pages and few subpages from both the dashboards, they are login page, signup page, forgot password, and dashboard (for student and admin separately).

Webpage be like
